EDUCATION

Çankaya University — Ankara, Turkey
BSc, Software Engineering (100% English) - GPA: 3.28 — Expected Jun 2028

Universidad Francisco de Vitoria – Erasmus+ Exchange Semester — Madrid, Spain
Computer Engineering – Erasmus+ scholarship, ranked 1st in department — Sep 2026 – Jan 2027

EXPERIENCE

Microsoft – AI Engineering Intern — July – August 2026

- Shipped Cover Letter Local, an open-source AI app that writes evidence-backed cover letters.
- Engineered hybrid RAG (BM25 + dense retrieval, RRF, reranking) on Microsoft Foundry Local.
- Orchestrated six parallel research agents with claim-level verification of generated content.

AI and Technology Academy (supported by Google) – Scholar — Nov 2024 – Aug 2025

- Selected as 1 of 500 AI Application Development scholars from 110,000+ applicants.
- Trained for 10 months in generative AI app development, FastAPI, and tech entrepreneurship.

Üniversite Tercih – Founder & Developer — Oct 2025 – Current

- Launched a monetized YKS placement platform reaching 550K monthly visitors in peak season.
- Designed score-based filtering, program comparison, preference sharing, and fuzzy search.

Öğrenci Dostu – Founder & Software Developer — Jun 2023 – Current

- Grew an education platform to 1,700+ articles, appearing 6M+ times a year in Google Search.
- Maintained the site on WordPress, focusing on SEO and scalable performance.

Aselsan – Computer Vision Trainee — Jan 2025 – Mar 2025

- Completed a 7-week OpenCV training in object detection, facial recognition, and video tracking.

Uptime System – Co-Founder & Full-Stack Developer — May 2020 – Apr 2024

- Co-developed an uptime monitoring system used by 2,700+ websites for reliability tracking.
- Wrote Node.js backend services handling API communication and third-party integrations.

PROJECTS

HEALTH-AI Co-Creation Platform – Sole Developer, EU Erasmus+ Project — Feb – May 2026

- Delivered the healthcare-engineering collaboration platform for an EU project of 7 universities.
- Implemented verified sign-up, NDA-gated meetings, audit logs, and GDPR export/deletion.

MetinEditoru.com – Founder & Lead Developer — Jan 2025 – Current

- Built a text editor ranked #1 on Google in Türkiye with React, TypeScript, and Monaco Editor.

CertifyHub.co – Founder & Lead Developer — Jan 2025 – Current

- Created a certificate portfolio platform using Next.js, TypeScript, MongoDB, and Gemini API.

PromptCraft – Lead Developer, Google AIJam 2025 — May 2025

- Led development of a prompt learning platform using Next.js, FastAPI, MongoDB, and Gemini API.

FocusFlow – Frontend Developer, Google YZTA Bootcamp — Jun – Aug 2025

- Prototyped an AI study planner with personalized scheduling using Python, React, and PostgreSQL.
